SAVE
SUSTAINABLE ACTIONS FOR VULNERABLE ENVIRONMENTS

SUSTAINABLE ACTIONS FOR VULNERABLE ENVIRONMENTS-PROFILE

WHO WE ARE

Sustainable **A**ctions for **V**ulnerable **E**nvironments (SAVE) is a non-governmental organization committed to promoting environmental sustainability and addressing the needs of vulnerable communities. With a strong focus on sustainable development, SAVE strives to create positive change by implementing projects and initiatives that protect and restore the environment, while also addressing the social, economic, and health challenges faced by vulnerable populations and create a more resilient and sustainable future for all.

VISION

Our vision is a world where vulnerable environments are protected, and sustainable development is the norm.

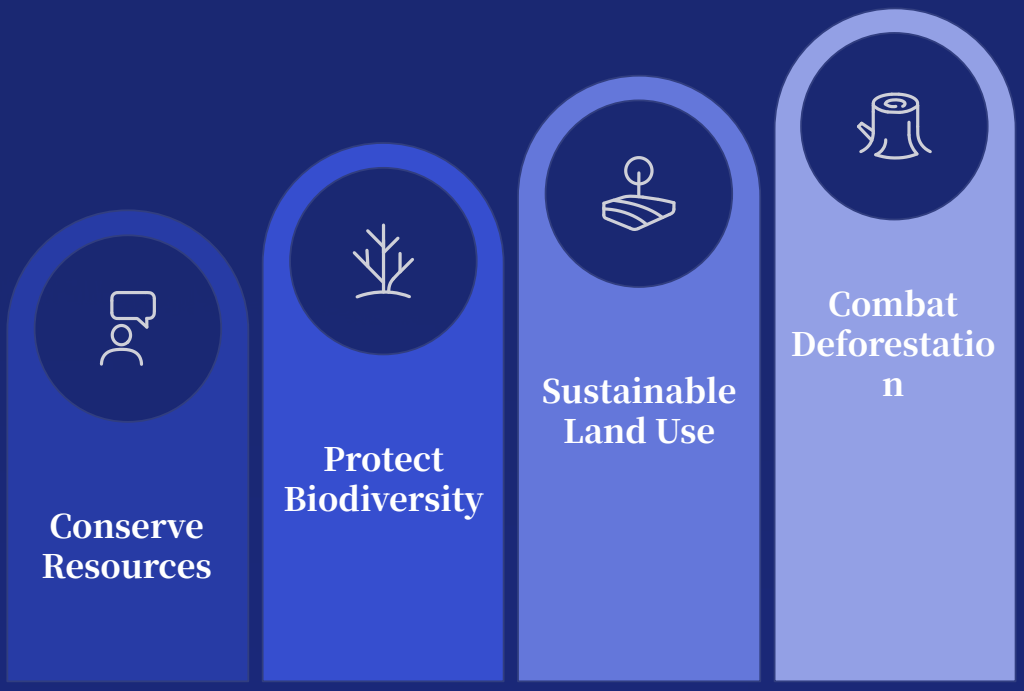

MISSION

To foster sustainable development, implement practical solutions to protect vulnerable environments affected by social and environmental challenges.

WHAT WE DO

Sustainable Natural Resource Management and Environmental Conservation.

We work towards conserving and preserving natural resources, including forests, water bodies, biodiversity, and ecosystems. Our efforts promote sustainable land use, combat deforestation, and protect endangered species. We also engage in climate change mitigation by reducing greenhouse gas emissions, carbon sequestration, promoting renewable energy, and implementing adaptation strategies for vulnerable communities.

Advocacy, Policy Influence, and Campaigns

SAVE actively engages with policymakers, local authorities, and relevant stakeholders to advocate for sustainable policies and regulations. We work to influence decision-making processes at local, national, and international levels, integrating environmental considerations, climate action, and social justice into policy frameworks. Our advocacy actions include speaking and acting on behalf of marginalized communities and those whose rights are infringed. We are committed to climate and social justice campaigns that raise awareness and drive collective action toward these critical issues

Health, Research and Education

SAVE acknowledges the critical role of health, research, and education in achieving sustainable development. We implement projects that focus on the linkages between environmental health and public health issues, especially in vulnerable communities, while also providing education and capacity-building programs to empower communities. Our initiatives expand access to clean water, sanitation, and healthcare while driving urgent awareness of how environmental degradation and climate change threaten health.

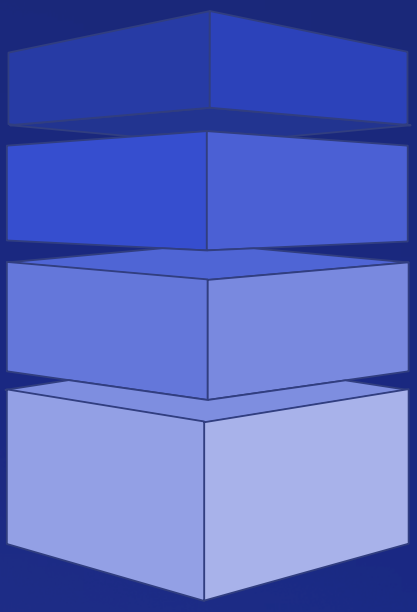

Foundational Needs

Focus on Environment, health, well-being, water, and sanitation.

Infrastructure Focus

Develop systems for Landscape Restoration, water, sanitation, and health.

Individual Focus

Empower individuals through education and knowledge.

Knowledge-Based

Leverage research and insights for strategic growth.

OUR CORE VALUES

- **Sustainability**

  We are committed to solutions that meet today's needs without compromising the ability of future generations to meet theirs.

- **Environmental stewardship**

  We are custodians of the environment, dedicated to conserving natural resources and protecting biodiversity.

- **Advocacy and justice**

  We speak up for environmental and social justice, working to influence policies and amplify the voices of those often unheard.

- **Knowledge and learning**

  We value research, education, and continuous learning to inform our actions and improve our impact.

- **Integrity and accountability**

  We uphold transparency, honesty, and responsibility in all our actions, ensuring that resources are used effectively and ethically.

- **Professionalism**

  We practice professionalism in everything that we do.

- **Simplicity**

  We deliver clear, practical, and sustainable solutions that are understandable, adoptable and beneficial without unnecessary complexity.

- **Research**

  Our work is evidence based, and research drives our advocacy messaging.

- **Collaboration and partnerships**

  We believe in building long lasting partnerships and networks.

- **Empowerment**

  We believe in having an empowered workforce, community and young people for effective results.

PROJECTS

1

sensors.AFRICA

Description: A Pan-African citizen science initiative that uses sensors to monitor air, water and sound pollution to give citizens, policy makers and CSOs (civil service organizations) actionable information about their cities to make better informed decisions.

Project Location: Mpika district

Project Status: On-going

2

Empowering Youth for Climate Action through Native Tree Restoration

Description: This pilot project seeks to empower youth at Kabale Secondary School in Mpika District to take active roles in climate action by establishing a sustainable native tree greenhouse. The initiative integrates environmental education with practical action, aiming to promote ecological awareness among students and the broader community.

Project Location: Mpika district

Project Status: On-going

3

Community Led Conservation Project in Kanyelele

Description: Research Paper (Investigating The Environmental Effects of Gold Mining in Kanyebele Village, Mpika.

Project Location: Mpika district

Project Status: Completed

SAVE seeks individuals, organizations, and volunteers who share our passion for sustainable action. You can contribute by donating, volunteering, participating in awareness campaigns, or collaborating on projects that align with our mission and objectives.

Join us in our journey to create a more sustainable and resilient future for all!!!
